Network Instruments® Unveils *Destination: Performance* Tour

Company to take the latest in performance troubleshooting to 10 cities

Minneapolis, MN – February 3, 2009 – Network Instruments, a leading provider of in-depth network intelligence and continuous availability, today announced the ***Destination: Performance*** tour. The tour, being held in ten cities across North America, will introduce network professionals to the latest troubleshooting trends and techniques including:

- Application performance monitoring
- VoIP and Unified Communications analysis
- Device and route monitoring
- Back-in-time troubleshooting
- Enterprise-wide reporting

“We feel strongly that with the increasing stability of networks and the growing demand for well-performing applications, our focus on maintaining optimal performance will resonate strongly with network professionals,” said Charles Thompson, Product Manager for Network Instruments. “The tour gives network professionals a unique opportunity to learn and discuss the latest in performance troubleshooting directly with our experts.”

Attendees will learn new approaches to optimizing network performance and handling application rollouts and problem isolation. In addition, they’ll see how the Observer® platform tackles performance challenges by providing high-level to packet-level views and expert analysis.

The ***Destination: Performance*** tour is scheduled to stop in the following cities:

Minneapolis, MN - February 12, 2009
Dallas, TX - March 3, 2009
Chicago, IL - March 4, 2009
Toronto, ON - March 5, 2009
Boston, MA - March 10, 2009
Philadelphia, PA - March 11, 2009
Atlanta, GA - March 12, 2009
Phoenix, AZ - March 24, 2009
San Francisco, CA - March 25, 2009
Seattle, WA - March 26, 2009

To learn more about the ***Destination: Performance*** tour, visit: www.networkinstruments.com/performance.
