Network Instruments® Announces Support for Microsoft Windows 7

Observer® Platform First Analysis Solution to Support Windows 7 Platform

Minneapolis, MN – October 22, 2009 – Network Instruments, a worldwide leader in network and application performance management, today announced that the Observer performance management platform supports the new Microsoft Windows 7 operating system. Network Instruments is the first analysis vendor to provide both 32-bit and 64-bit scalable solutions that support the Windows 7 platform.

“At Network Instruments, we continually integrate new technologies to meet the demands of enterprise networks,” said Douglas Smith, president and co-founder of Network Instruments. “Utilizing Observer’s integrated Windows 7 support and a 64-bit system, users can expect boosts in both processing speeds and performance. By supporting the latest Microsoft offerings, providing the largest capture buffers, and offering internally-engineered capture cards, our solutions provide higher performance levels unparalleled in the industry.”

The newly-released Observer 14, which will be automatically provided to all Network Instruments Observer maintenance customers, fully supports Windows 7. To verify previous Observer version support for Windows 7, please contact your Network Instruments support representative.

###

About Network Instruments

Network Instruments, a leading provider of performance management and troubleshooting for fifteen years, helps organizations ensure the delivery of business-critical applications. The company’s platform of management and reporting products provides comprehensive visibility into networks and applications to optimize performance, speed troubleshooting, and assist long-term capacity planning. Network Instruments achieved profitability in its first quarter and posted double-digit growth every year since its founding – without any external funding. Headquartered in Minneapolis, the company has sales offices worldwide and distributors in over 50 countries. For more information, please visit www.networkinstruments.com.
